

Kennecott Utah Copper

Energy Efficiency Policy

In recognition of Rio Tinto's Climate Change Position and consistent with its Sustainable Development Policy, Kennecott Utah Copper (KUC) is committed to continual improvement in energy efficiency across the business. To that end, we shall:

- Create a culture that values energy conservation by providing the necessary resources and training.
- Recognize that energy efficiency gains can be made by small improvements as well as major changes.
- Implement energy efficiency solutions and evaluate sustainable energy options.
- Establish energy efficiency standards for equipment and facilities throughout their lifecycle.
- Develop systems and procedures to ensure consistent and ongoing measurement, evaluation and reporting of energy consumption.
- Develop area-specific energy targets and hold ourselves accountable.
- Communicate progress against our targets to stakeholders on a regular basis.

This policy outlines our commitment to our employees, shareholders, communities and customers.
