

Silver

At Kennecott Utah Copper (KUC), we take pride in responsibly producing our silver bars. One way we do this is by maintaining complete control of the production process. From mining the ore to processing the silver through one of the world's cleanest, most energy-efficient and technologically-advanced smelters and refineries, KUC silver is subject to our rigorous standards.

Each of our silver bars is marked with the distinctive KUC hallmark, the bar weight in troy ounces, the fineness, cast and bar number, and the year of production to provide complete traceability and to ensure the accuracy of the source of origin.

Our silver bars play an important part in making jewelry as well as a wide range of electronic applications: batteries, motors, medical, photography and imaging.

The superior conductivity, high ductility and malleability, make KUC silver bars an ideal choice for many applications.

Our chemistry consistently meets or exceeds the chemical requirements for ASTM B-413-97a for Grade 99.95 and our bars are approved for delivery on the London Bullion Market Association.

Typical	Averages
Ag Fineness	999.8636
Au PPM	5

SIZING

Trapezoid Bars

- Base: 14.00" x 6.5"
- Top: 14.625" x 7.25"
- Height: 4.5625"
- Weight: nominal 1,000 Troy ounces

HALLMARK

Rio Tinto and Kennecott Utah Copper

Rio Tinto is a world leader in finding, mining and processing the earth's mineral resources. Rio Tinto has operations in Australia, Asia, North and South America, Europe and Africa. Rio Tinto produces aluminum, copper, diamonds, gold, silver, molybdenum, industrial minerals, energy and iron ore. The company employs over 65,000 employees globally.

Kennecott Utah Copper (KUC) is a wholly owned subsidiary of Rio Tinto. For more than 105 years, KUC has been mining and processing minerals from the rich ore body of the Bingham Canyon Mine. KUC produces copper, molybdenum, gold, silver and sulfuric acid, and ships those products around the world to meet customers' needs.

Sustainable development

For Rio Tinto and KUC, sustainable development is more than just a catch phrase. By aligning our business strategies and daily practices around sustainable development, we are able to strengthen our operations and products, build enduring communities, and provide lasting benefits for our customers, employees and stakeholders. For more on our sustainable development activities, please visit www.kennecott.com.

Safety

At KUC, our goal is to ensure that each employee goes home safe at night. This type of commitment and the investment of time, resources and training, have produced recent safety statistics that are significantly better than the industry average for all injury frequency rates. Safety is a core value and an essential part of the culture at KUC and Rio Tinto.
